EDUCATION

West Virginia University

Expected May 2027

PhD in Economics

Youngstown State University

Jan 2021 – May 2022

MS in Mathematics

Youngstown State University

Jan 2021 – May 2022

Graduate Certificate in Data Analytics

- Coursework in Data Management (relational database design, SQL, normalization, data warehousing), Data Visualization, and Predictive Modeling Algorithms.

Youngstown State University

Aug 2019 – Dec 2020

MA in Economics

University of Education, Winneba, Ghana

Aug 2014 – May 2018

BA in Economics

RESEARCH FIELDS

Primary: Health Economics, Labor Economics

Secondary: Public Economics, Applied Microeconometrics, Political Economy, Urban and Regional Economics

Teaching Fields: Principles of Microeconomics and Macroeconomics, Business and Economic Statistics, Econometrics, Mathematical Statistics, College Algebra

JOB MARKET PAPER

“Extending Postpartum Medicaid Without Discouraging Work.”

The American Rescue Plan Act allowed states to extend pregnancy-related Medicaid coverage from sixty days to twelve months postpartum. Using American Community Survey data and a triple-differences design, I compare recent mothers with mothers of older children in states where the extension was legally in force versus states where it was not when Medicaid redeterminations resumed in 2023. Under the preferred legal-effective-date coding, the extension increased Medicaid coverage among low-income recent mothers by roughly three to four percentage points, with no systematic reduction in employment, labor-force participation, or hours worked.

DISSERTATION

Three Essays on Public Policy: Health Insurance, Administrative Burden, and Legislative Behavior

Chair: Professor Daniel Grossman

- Chapter 1. “Extending Postpartum Medicaid Without Discouraging Work” (job market paper). Revised draft.
- Chapter 2. “The Political Economy of Veto Overrides: Evidence from the Justice Against Sponsors of Terrorism Act (JASTA),” with Dorothy Kemboi. Published.
- Chapter 3. “Postpartum Medicaid Expansion, Coverage Unwinding, and Maternal Insurance Coverage,” with Daniel Grossman, Elaine Hill, Aniket Patil, and Grace Sventek. Working draft using CMS administrative claims and the American Community Survey.

PUBLICATIONS

- Teye, J., and Kemboi, D. (2025). “The Political Economy of Veto Overrides: Evidence from the Justice Against Sponsors of Terrorism Act (JASTA).” *Peace Economics, Peace Science and Public Policy*, 31(3), 305–321. <https://doi.org/10.1515/peps-2024-0058>

WORKING PAPERS

- Grossman, D., Hill, E., Patil, A., Sventek, G., and Teye, J. (2026). “Postpartum Medicaid Expansion, Coverage Unwinding, and Maternal Insurance Coverage” (author order alphabetical).
- Teye, J. (2026). “Extending Postpartum Medicaid Without Discouraging Work.”

POLICY REPORTS

- Teye, J. (2021). “Economic Impacts of Mahoning County Land Bank.” Prepared for the Mahoning County Land Reutilization Corporation, Youngstown State University, May 2021.

PRESENTATIONS

- “Postpartum Medicaid Expansion, Coverage Unwinding, and Maternal Insurance Coverage.” American Society of Health Economists (ASHEcon) Annual Conference, Minneapolis, MN, June 2026.

TEACHING EXPERIENCE

West Virginia University

Aug 2025 – Present

Instructor of Record

Sole instructor for ECON 225 (online, Fall 2025 and Fall 2026) and ECON 201 (in person, Spring 2026), with approximately 60 students per course.

- Designed all course materials, assessments, and grading, and built a fully online section of ECON 225 organized into weekly modules of readings, annotated chapter notes, embedded video quizzes, and timed online exams.
- Adopted a free OpenStax open educational resource to reduce student cost and designed a semester-long Excel data project, in place of a final exam, requiring students to collect, summarize, and apply inferential techniques to their own data.
- Taught a course satisfying WVU's General Education Foundations F3 (Mathematics and Quantitative Skills) requirement, covering descriptive statistics, probability and sampling distributions, confidence intervals, hypothesis testing, and simple linear regression.
- Received strong student evaluations in ECON 225: 83% rated concept presentation as beneficial, 88% the variety and design of assessments, and 82% instructor responsiveness and feedback.

West Virginia University

Aug 2023 – May 2025

Graduate Teaching Assistant

Elementary Business and Economic Statistics (ECON 225), Principles of Microeconomics (ECON 201), Principles of Macroeconomics (ECON 202), and Survey of Economics.

- Led tutorial sections during office hours on the statistical tools used to analyze data, and provided additional support to students who had fallen behind.
- Graded quizzes and exams and provided written feedback to students.
- Introduced students to R and supported them through their weekly data assignments and final term projects.

Youngstown State University

Aug 2022 – May 2023

Part-Time Faculty

Instructor for Statistical Literacy and Critical Reasoning and for College Algebra.

- Planned and delivered instruction independently, and returned graded work promptly to sustain student engagement.
- Developed writing assignments, classroom presentations, and experiential exercises to build communication and critical reasoning skills.
- Designed assessment methods that measured student progress against course outcomes consistently and in line with divisional requirements.

University of Education, Winneba, Ghana

Aug 2018 – Jul 2019

Part-Time Faculty

- Taught Econometrics and Statistics to more than 150 second-year undergraduate students, including applied data analysis in SPSS and Stata.

- Supervised final-year students on their research projects, particularly in the use of SPSS, SAS, and Stata.
- Conducted introductory SPSS, SAS, and Stata tutorials for students interested in data analytics.

RESEARCH AND PROFESSIONAL EXPERIENCE

Eastgate Regional Council of Governments

Oct 2019 – Aug 2022

Data Analytics Intern

Joined to support the EDA-funded Eastgate Economic Recovery Coordination program (Oct 2019 – Dec 2020), the regional response to the 2019 closure of the General Motors Lordstown assembly plant, delivered through a Youngstown State University coordination team. Retained through Aug 2022 for continuing data and reporting support.

- Built and maintained the Economic Development Administration (EDA) project database, standardizing records for regional reporting and federal grant documentation.
- Assembled, cleaned, and managed economic and demographic data across Mahoning, Trumbull, and Ashtabula counties using R and SPSS.
- Produced visualizations and summary analyses of the economic and social impacts of EDA-facilitated projects for planners, local officials, and non-technical stakeholders.
- Conducted the economic impact analysis of the General Motors Lordstown closure (Aug 2019 – May 2020) under an Eastgate grant at Youngstown State University.

Western Reserve Transit Authority

Aug 2022 – Dec 2022

Data Analytics Project

Autonomous vehicle route study conducted with the Western Reserve Transit Authority, Mercy Health, and faculty at Youngstown State University (Dr. G. Jay Kerns and Dr. Thomas P. Wakefield).

- Extracted and cleaned Youngstown StreetLight mobile location data in Python and R to identify target demographics and recommend stop locations for the autonomous vehicle route.
- Conducted cluster analysis of the frequency and timing of ridership along the selected route.
- Built an interactive Tableau dashboard allowing users to filter ridership by time, sex, income, education, and race.

SELECTED PROJECTS

- “Quantitative Risk Assessment with Continuous Data.” MS research paper, Youngstown State University, December 2022.
- “Economic Impact of State Manufacturing Employment on the United States Economy.” MA research paper, Youngstown State University, December 2020.
- “Factors Associated with the Utilization of Healthcare Services Among the Elderly in Ghana.” Undergraduate research paper, University of Education, Winneba, July 2018.

AWARDS AND GRANTS

- Graduate Assistantship, West Virginia University, Aug 2023 – May 2027.
- Graduate Teaching Assistantship, Youngstown State University, Aug 2019 – May 2021.
- Research grant and scholarship of \$21,500 for the economic impact analysis of the Mahoning County Land Bank, Youngstown State University, 2020–2021.
- Research grant and scholarship of \$9,359 for the economic impact analysis of the General Motors Lordstown closure, Eastgate Regional Council of Governments, Aug 2019 – May 2020.

PROFESSIONAL MEMBERSHIPS

American Economic Association (AEA); American Society of Health Economists (ASHEcon); Mathematical Association of America (MAA)

SKILLS

Econometric Methods: Causal inference (difference-in-differences, staggered adoption, triple differences, event study), inference with few treated clusters, multiple-testing corrections, regression analysis

Software: R, Stata, Python, SQL, SAS, SPSS, IMPLAN, Tableau, Excel, LaTeX

Data: Large administrative and survey data (CMS Medicaid claims, American Community Survey); relational database design and management; predictive modeling and cluster analysis; economic impact and input-output modeling
